MA: Sandwich - 180 Cotuit Road January Production

Events: -

1. The site was offline from 01/28 due to an inverter fault. Later, Power Electronics brought the site back online on 01/31 by pulling the logs. SR096048

MA: Sandwich - 180 Cotuit Road February Production

Events:

1. On 02/18/25, the technician found CB 15 strings 19 & 20 carrying 4 amps. Further investigation is needed to check for a ground fault or module issue. SR096077, SR097256.
2. The site was offline from 6:30 to 14:15 on 02/25/25 due to an inverter fault. The PE technician enabled all modules, put them instartmode, and brought the site back online. SR097746.

MA: Sandwich - 180 Cotuit Road March Production

Events:

1. The site was taken offline from 08:30 to 14:45 on 03/12 due to an HVAC technician being on-site to check the site camera. SR098449
2. Power Electronics on site to perform retrospective ventilation. The Inverter will be taken offline from 11:30 to 13:15 on 03/28. SR099079
3. On 02/18/25, the technician found CB 15 strings 19 & 20 carrying 4 amps. Further investigation is needed tocheck for a ground fault or module issue. SR096077, SR097256, SR099474

MA: Sandwich - 180 Cotuit Road April Production

Events:-

1. The site was de-energized from 12:45 PM to 2:45 PM on04/02 while PE was onsite to inspect inverter settings. **SR099316**
2. On 04/03 and 04/05, the inverter failed to start production but was brought back online after a technician performed a remote reset**. SR099371**

3. On 04/04, a technician checked in to investigate DC strings 19 and 20 in CB15 and discovered reverse polarity in jumper connections to a Northern Row. The jumpers were rewired with correct polarity, and final testing confirmed both strings were producing normally. **SR097256, SR099474 & SR099475.**

4. On 04/11/25, discrepancies were noted between meter and inverter readings, with the meter peaking at 3 MW while the inverter maxed at 2.2 MW. AE responded on 04/15/25, suggesting potential bin size logging or data latency issues and implemented logger setting changes. The issue now appears resolved, though the root cause remains unknown. PowerTrack still needs BESS data configured for accurate PV monitoring. **SR099700**

5. On 04/18, the inverter began production at 10:00 AM after experiencing a Softcharge DC5 fault. **SR099978**

6. Inverter tripped offline at 17:00 on 04/24 due to BW BF. PS. 151 fault and back online at 10Am on 04/25 after PE technician initiated the wake-up and soft charge process. **SR10036**
